

WORLD S.B.'14- BARCELONA

FIRST SESSION - OCTOBER 28th PROGRAMME

TITLE: Which methodologies, tools and projects for Energy Renovation in Buildings within MED Regional Strategies should be used in the framework of EU Directives?

Scheduled: 17.00-19.00 h

Lounge capacity: 100 people

ABSTRACT:

After more than 3 years, the joint effort of the MARIE 23 partners is producing main fruits and results. These results are organized in three main drivers to facilitate the implementation of strategies for energy renovation in buildings in Mediterranean: Policy Commitments Portfolio (PCP), Mediterranean Building Energy Efficiency Strategy (MEDBEES) and Macro Interest and Impact Projects (MIIPs).

The three drivers should create a *snowball effect* that benefits all parties involved, producing major social, economic, environmental and energy benefits in the next future. During this session, MARIE partners will present the most interesting results related to the last two drivers, MEDBEES and MIIP.

MEDBEES will be presented as a Products Box, which public and private organisations can use to look for guides, tools, models or programmes useful to improve their own strategies to renovate buildings.

MIIPs are the desired result to transform strategy into a real impact. Also, public and private organisations will be able to find model criteria, assessments and good practices from projects that can serve as replication and demonstration examples to implement strategies.

Speakers:

Introductory speech: Curzio Cervelli, *JTS MED*

BLOC 1: Regional Strategies

- The MARIE common approach for Energy Renovation in Buildings regional strategies preparation. Xavier Martí. Marie Coordinator (*DTES-Generalitat de Catalunya*).

BLOC 2: MEDBEES

- Intervention Factory: Christoph Peters (*LIMA*); Joana Ortiz (*IREC*); Esther Castillo (*AVRA*)
- Marketing and Training Programmes. Aniela Herrenschmidt (*Région PACA*); Fabian Llisterri (*UMAR*).
- Innovation Lab: Luisa Abrigo (*Piedmont Region*), Pere Navarro (*CTFC*).

BLOC 3: MIIPs

- EPC Contract in CAR Sant Cugat, Juanjo Escobar (*ICAEN-Generalitat de Catalunya*)
- Slovenian ESCO Model Brda, Miha Valentincic (*Petrol D.D.*)
- Greek ESCO Model Thanos Papatris (*Euroconsultants SA*)
- Biomass boilers for Catalan local government buildings. Denis Boglio (*CTFC*)

BLOC 4: QUESTIONS, DEBATE & CONCLUSION
