

MED Programme targeted calls / Appels ciblés Programme MED

- ✦ Innovation for renewable energy and energy efficiency solutions in Mediterranean regions and cities
Priority axis 1 (objectives 1.1 and 1.2) and priority axis 2 (objective 2.2) ✦ February, 10th – April, 12th 2012

Innovation pour les énergies renouvelables et efficacité énergétique dans les régions méditerranéennes ✦
Axes prioritaires 1 (objectifs 1.1 et 1.2) et 2 (objectif 2.2) ✦ 10 février – 12 avril 2012
- ✦ Strengthening Mediterranean port activities and EU accessibility with simpler norms and a better use of information technologies ✦ Priority axis 3 (objective 3.1) ✦ February 27th – April, 27th 2012

Renforcer l'activité des ports méditerranéens et l'accessibilité UE en simplifiant les normes et en développant l'usage des technologies de l'information ✦ Axe prioritaire 3 (objectif 3.1) ✦ 27 février – 27 avril 2012

Using renewable energy sources in Municipality of Tuzla

Theme or keywords (for orientation see Terms of References) • Thème ou mots clés (pour orientation, veuillez consulter le cahier des charges)

Solar Energy, Renewable Energy Sources

Programme objective • Objectif du Programme

- Objective 1.1 • Objectif 1.1
 Objective 1.2 • Objectif 1.2
 Objective 2.2 • Objectif 2.2
 Objective 3.1 • Objectif 3.1

Project idea in short (max 300 words) • Idée en bref (300 mots max.)

Tuzla is the first municipality in Bosnia and Herzegovina to accede to the Mayors' Agreement on Energy Efficiency, and which, in accordance with the signed Agreement, drafted the SEAP (Sustainable Energy Action Plan) with clearly defined measures and actions to reduce energy consumption and foster the use of renewable energy sources.

Tuzla Municipality has recognized the importance of renewable energy sources, and has implemented several solar collector installation projects, which are no longer a trend but a necessity. Big savings in electricity consumption are achieved thanks to this form of heating.

One of the buildings owned by the Municipality of Tuzla, in which many energy efficiency projects have been implemented, aimed to achieve energy independence of the facility is the cultural and sports centre Mejdán. The cultural and sports centre Mejdán Tuzla was built in 1984, to meet the interests of the citizens of Tuzla, Tuzla Canton and Bosnia and Herzegovina, in the field of sport and culture, and to create conditions for the enhancement and improvement of the form and content of high – quality sport, cultural and artistic creativity, and various business events.

The subject of this application is the implementation of the Phase II of installation of photovoltaic collectors to generate electricity of 33 kW, on the roof of the building, which would significantly reduce energy consumption within the building, enhance its energy independence and sustainability.

Installing new photovoltaic collectors to generate electricity, which is the subject of this project (application), is a step closer towards achieving this goal, the goals set out by SEAP, and towards reducing CO2 emissions into the atmosphere.

Please name the work package you would like to develop • Veuillez indiquer le ‘workpackage’ que vous voulez développer

The purpose of the project proposal is that sports and cultural centre Mejdán, which is of great importance for cultural and sporting life of Tuzla municipality and the region, become energy independent facility.

Main beneficiaries/target groups • Bénéficiaires/ groupes ciblés principaux

Municipality Tuzla, cultural and sports centre Mejdán, sport clubs, Local population

Approximate budget • Budget approximatif

Approximate budget: 100.000,00 EURO
